

See: The new all-electric Lexus RZ 450e

The RZ 450e, Lexus' first model to be developed as a BEV, underwent extensive track testing, and refinement, to achieve zero-emission, all-electric driving and to improve the BEV driving experience.

The vehicle, an electric SUV that has been constructed on a dedicated BEV platform, has a spindle body design and is powered by e-Axles with DIRECT4 all-wheel drive torque control.
