

Flight Centre app aims to simplify travel

The Flight Centre Travel Group has launched a new app, which will allow users to local and international flights. The app will also allow users to plan a holiday as it provides tools that will enhance travel during a trip, including a built-in navigation system and an activities exploration feature.

Key app features in the near future will include:

- My Trips: Travel itinerary examples and the functionality to keep track of upcoming and past trips booked with Flight Centre.
- Quote request: Know where you want to go? Request a quote from our travel experts.
- View deals: Gain access to hundreds of travel deals offered by Flight Centre.
- Discover: Search for restaurants, coffee shops, key sights and shops in an area.
- Directions: A built-in navigation system offering real-time navigation.
- Activities: Allowing users to search for and research activities, either before your departure or during your travel.

To access the new Flight Centre App, users will need to create an account. The app is available for Android and iOS.
