

Cold Chain Refrigeration Logistics and Technology Summit 2024

Cold chain logistics continues to transform from a specialised sector into a key pillar of our global supply chains.

Robust cold chain management system is integral to the success and sustainability of South Africa's agricultural, pharmaceutical, and food industries. It not only ensures the delivery of high-quality products to consumers but also contributes to economic development and global competitiveness. As such, continued investments in cold chain infrastructure and technology are essential for the country's growth and resilience in the face of evolving challenges.

With a growing dependence on these systems to deliver temperature-sensitive goods in top-notch condition—from essential vaccines to the daily staples in our fridges—it's more important than ever that logistics technology makes it easier and more efficient to manage the nuances of temperature-controlled shipping.

Technological breakthroughs and a dedicated push toward sustainability are at the heart of digital transformation driving cold chain logistics forward.

Date: 22 May 2024 to 23 May 2024

Time: 08:00 - 17:00

Venue: Protea by Marriott Hotel Stellenbosch and Conference Centre, Stellenbosch
