

3D Design goes on a road trip

3D Design recently travelled to Zimbabwe to build a 198m2 'full on' custom stand for the Russian Federation at the Zimbabwe International Trade Fair.

Despite border delays, the build went smoothly.

The team of 13 – including audio visual specialists, electricians, carpenters and graphic applications – was managed by 3D director Ivor Allison and Nick Brand. They travelled in a convoy of three 8-ton trucks and one 5-ton truck.
