

Emirates now offers 21 weekly flights to Cairo

Emirates will introduce four weekly additional flights to Cairo from 29 October 2017. This will increase the flights between Dubai and Cairo to three each day and take the total number of weekly Emirates flights serving Cairo to 21.

Emirates started operations to Cairo in April 1986 with three flights a week. The new flights will be operated by a 360-seat Boeing 777-300ER in a three-class configuration featuring eight private suites, 42 business class, and 310 economy class seats.
