

Samsung Smart School initiative launches in Senegal

The Senegal Ministry of Education and Samsung Electronics Africa, have announced the launch of a mobile education solution aimed at creating positive change and providing an advanced and interactive classroom experience for learners.

Installed at the Plan Jaxaay Secondary School, the Samsung Smart School initiative is an integrated platform that includes a monitoring and controlling feature - which allows teachers to keep track of educational content on their learners' screens - a screen-sharing feature and a real-time question-and-answer feature.

Samsung's Corporate Citizenship arm has always supported the development of education with the view of impacting society and the economy. Samsung believes that access to technology can create new learning possibilities for students, paving their way towards lifelong learning and personal development in order to acquire the knowledge and skills needed in today's society.

Launched in the country in partnership with Millennium Connect Africa, the initiative is part of the company's far-reaching African citizenship programme, designed to positively impact the lives of Africans.

Smart Schools have also been installed in countries like Mali, South Africa, Kenya, Rwanda, DR Congo and Sudan.
